

## External wall sliding doors

### INSIDE sliding

Disappearing sliding system boxed inside the plasterboard. The Inside version sliding doors are supplied only with VITRA line and produced in tempered safety glass, also stratified.

The peculiarity of this kind of sliding system consists in having all the fixing and regulation systems hidden inside the profile boxed inside the false ceiling: in this way, only the glass door remain visible, giving an extreme formal clean result.

**Dimensions on demand.** The doors can be customized with a maximum width of 1260 mm and a maximum height of 3000 mm. Glass thickness 10 mm (tempered monolithic or tempered stratified).
