

T.B.T.2 S.r.l. Ravenna

Renovated showroom and New HenryGlass Corner

The 2020 of our dealer began with great news starting from the new look of the showroom in via Achille Grandi in Ravenna. The exposition space dedicated to HenryGlass has been set up in order to allow customers to admire the new solutions for opening systems, allowing them to immerse themselves in the HenryGlass world with elegance and refinement.

Starting from the initial project, T.B.T.2 architects have worked consistently with the guidelines that studio Nicola Gallizia has set to give the possibility to create a setting up capable of maximising the range of HenryGlass products, but also its background.

The final outcome is a modern space, perfect for those who love a refined and contemporary design, but who knows how to look with style and passion at the classic.

A real corner of HenryGlass where modernity and product research coexist tunefully and in harmony with the surrounding environment. The news lies in the fact that the door is no longer interpreted only as a functional element, becoming a real piece of furniture. Glass doors interpret the authenticity of refined materials such as marble and concrete, through the refinement of fine fabrics they communicate the enormous possibilities of combination between the door and the wall through the use of wallpaper that is in continuity with the door's decoration.

T.B.T.2 store understood the added value of setting the doors within a furnished and coherent space by focusing on the quality of the exposed products rather than on the quantity, allowing visitors to touch the maximum freedom of design arrived thanks to the wide offer.
